

PROCESSES & TECHNOLOGIES

TECHNICAL STRENGTH AND EXPERIENCE FOR EXCELLENT QUALITY PARTS.

Spring technologies

Tailored to your application - whether wire or strip-related.

Injection molding

We are your partner from conception to production.

Laser welding technology

Focused energy gets straight to the point.

Clean room production

Available at CARL HAAS in accordance with ISO 7 & GMP C.

Customer-specific packaging

Packaging for high-quality products that meet your requirements.

Measuring equipment technology

Highest precision for repeatable and reliable measurements.

Micro-turning

Perfect micro-turned parts made of all common machinable materials.

Stamping and bending technology

High-precision and technical strength.

Surface treatment

To improve the functionality of all springs and components.

Engineering

Development expertise from concept to production.

Drawing and rolling

You want smaller and finer dimensions? We can do it for you.

Quality assurance

Exceeding your expectations!

KERN-LIEBERS

GROUP OF COMPANIES

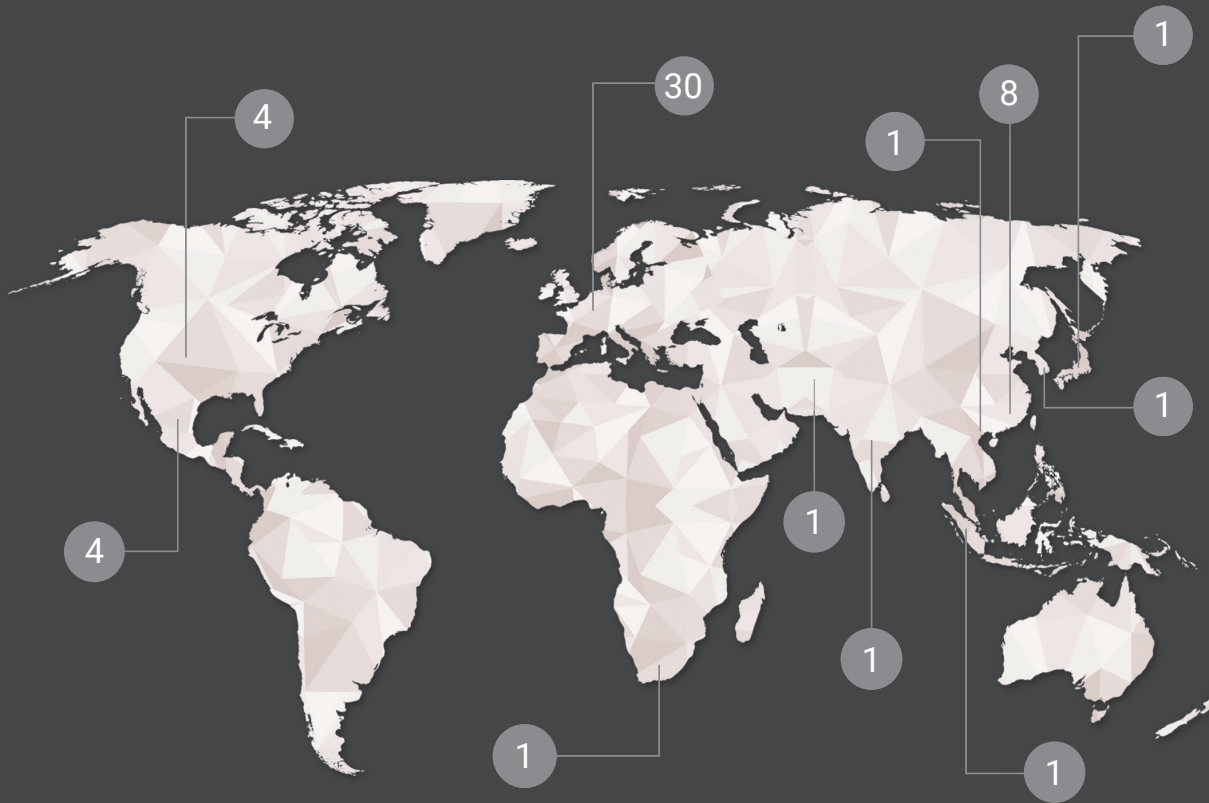

THE KERN-LIEBERS GROUP OF COMPANIES. A SIZE THAT PAYS OFF.

When you put your trust in KERN-LIEBERS, you benefit not only from the strength of an individual company, but from the unique expertise of a global group of companies that sets new standards every day. Standards in terms of quality, competence and performance.

CARL HAAS GMBH
PASSION FOR YOUR SUCCESS.

Only those who bring pleasure and passion to the support of their customers can create real added value. That's why we at CARL HAAS are committed to working efficiently together across departments and hierarchies, and cooperate with our suppliers and customers. Because the success of CARL HAAS is closely linked to the success of you as our customer, we work closely with you right from the idea and development phase to gain a comprehensive understanding of the challenge at hand and the solution required.

With this knowledge, we develop an individual and optimum solution, drawing on our long-standing, trusted suppliers and partners and on our affiliates in the KERN-LIEBERS group of companies. The hallmarks of this goal-oriented partnership of cooperation are a focus on solutions, a sense of responsibility and fairness. Our value-based management facilitates our people in developing a strong collective desire to strive for improvement. Experience our spirit – passion for your success!

YEARS
OF EXPERIENCE

OUR PRODUCT RANGE
INDIVIDUAL, HIGH-PRECISION, COMPLIANT.

With extensive experience in the watch industry, CARL HAAS has been successful in the manufacturing of medical components and products for more than 30 years. Because of our wide range of in-house technologies, we can work together with you to produce solutions for your specific products.

We offer you solutions for demanding products, taking account of technical cleanliness and biological compatibility. We live processes and products that conform to the highest standards, therefore our management system is certified according to DIN EN ISO 13485, 14001, 50001 and 9001/ IATF 16949.

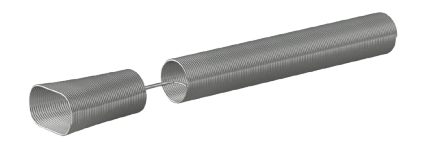

GUIDEWIRES
 Our extensive experience in the development and manufacture of guidewires allows us to reliably offer you high-quality products - from prototypes to high-volume production.

STONE EXTRACTOR BASKETS
 The innovative product range of stone extractor baskets from CARL HAAS is the ideal surgical option to remove kidney and bladder stones. CARL HAAS has developed a series of products with different numbers of wires and in various shapes.

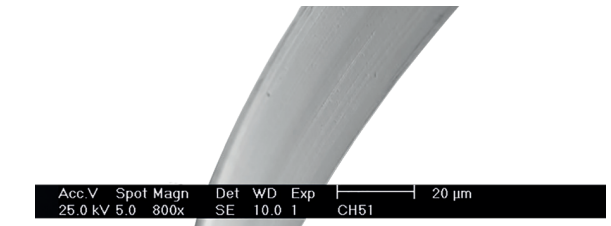

MICRO-TURNED PARTS
 Decades of manufacturing experience: macro know-how for micro precision-turned parts.

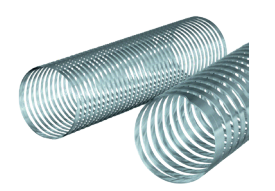

URETER PROSTHESES
 The first ureter prostheses were developed in the eighties. Since then, we have continuously developed this product to improve the product properties.

SET AND UNSET SPRINGS FOR THE SPECTACLES INDUSTRY
 Production of the smallest, highly loaded compression springs, which ensure the function of spring hinges in the spectacle optics.

ULTRA-FINE WIRES AND FLAT WIRES
 The finest wires and high precision strips with CARL HAAS-developed drawing machines and rolling mills.

REINFORCEMENT SPIRALS
 The spirals are used for the reinforcement of e.g. tracheal tubes in order to improve their dimensional stability.

ASSEMBLIES
 Our wide range of technologies enables us to produce hybrid assemblies for you as our customer, even in clean rooms.

SPECIAL SOLUTIONS
 All prototypes and small batches of our special solutions for the medical technology will be produced according to your specific requirements. We process all stainless steels according to DIN and AISI, including the common implant materials.
