

A TOUCH BETTER

OUR BUSINESS

Abatek International AG is a significant global supplier of silicone elastomer keypads, assemblies and connectors for use in electronic input/output devices. Our company supplies custom solutions to the automotive, consumer, instrumentation, medical and telecommunications segments worldwide.

We offer a wide range of technologies to customers using rubber, plastics and various hybrid materials. We develop markets and sell tailor-made solutions, manufactured in our own production facilities or with strategic partners in Asia (LCC).

We serve our customers worldwide since over 20 years through our own sales organizations in Switzerland, Thailand and the USA with our experience in Engineering and Project Management.

We possess years of technical know-how and expertise to successfully design, develop and manufacture quality tailor-made solutions.

OUR SERVICES

Tailor-made solutions made of silicone elastomer for input and output devices

OUR SERVICES

1. **We are focused on customer needs:** Customers are at the core of our business philosophy. We strive to provide you with world class quality products and services. Our customer's advantage: the highest quality at competitive pricing, as well as full control over projects from conception to delivery and service.
2. **Local support world-wide:** Skilled key accounts and factory-trained application engineers dedicated to providing technical and commercial on-site support to designers, engineers and buyers. Due to our multilingual team we can advise you individually on site or by telephone. Our teams work together closely to provide the highest level of service worldwide for our customers.
3. **Quality:** Our qualified professionals are readily available to all customers worldwide. Continuous improvement and ongoing training holds us to the highest standards (TS-16949 certified) in the industry.
4. **Development support:** Comprehensive self-study manual exists for keypad design to empower your engineering and to adopt the vast range of keypad solutions by yourself. Customized workshops around the Design Guide are available to introduce you to the world of silicone keypads and their optimal applications.
5. **R&D Dept.:** Product innovations are a core goal for us to assure your competitiveness. Test laboratories are available at our production facilities but also at our regional officer.
6. **Buying at Source:** Buying at source with a trusted vendor network secures a know-how transfer throughout the whole value chain at competitive prices without agent's royalty's surcharges.

Please contact our sales office closest to you for the next project or latest technology
